## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on May 13, 2004 has been considered.

### **Objection**

The use trademark in the specification has been noted in this application. They should be capitalized wherever they appear and be accompanied by the generic terminology. Preferably applicant should list the ingredients contained in the PROPOFLO™, RAPINOVET™ (on page 2 of specification lines 22+) at the time the invention was made. Note that over time the trademark can change and will not enable one skill in the art to carry out the same experiments.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

### ***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 2 are rejected under 35 U.S.C. 102(a) as being unpatentable by Carpenter et al., US 6,150,423.

Carpenter discloses an aqueous composition comprising propofol (column 2 lines 41+) and one or more excipient (benzalkonium chloride, benzethonium chloride (column 3 line 56+). See claims 1 and 2.

Art Unit: 1614

Claims 1 and 3 are rejected under 35 U.S.C. 102(a) as being unpatentable by Glen et al., US 4,798,846.

Glen discloses composition propofol (claim 1) is selected from the group consisting "Cremaphor" EL column 6 line 24 which is the item (a) of claim 3.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-16 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-16 of copending Application No. 10,677,747. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 1614

The scope of the claims 1-16 are drawn to the same aqueous pharmaceutical composition comprising propofol in co-pending application and are word for word identical.

No claims are allowed.
